

$$\begin{array}{r} 367 \\ + 999 \\ \hline \end{array} \quad \begin{array}{r} 526 \\ - 98 \\ \hline \end{array} \quad \begin{array}{r} 34 \times 11 = \\ 4271 \times 9999 = \end{array} \quad \begin{array}{r} 512 \div 32 = \\ 784 \div 14 = \end{array}$$

Learn to solve this set of problems with accuracy in just 10 to 15 SECONDS!

$$\begin{array}{r} 108^2 = \\ 504^2 = \end{array} \quad \begin{array}{r} 1105^2 = \\ 9997^2 = \end{array} \quad \begin{array}{r} 119 \times 120 = \\ 590 \times 610 = \end{array}$$

20 SECONDS is enough to solve this set of problems. Learn how!

- 1) Find the product of 97 and 94.
- 2) Find the sum of the first 100 positive odd integers.
- 3) Find the sum of  $2 + 4 + 8 + 16 + 32 + 64 + 128 + 256$ .

Train yourself to be a competitive student in math!  
Study how to solve this kind of problems with LESS effort and LESS time!

- 1) There are 30 pigs and chickens in a farm. The total number of legs is 84. How many pigs and how many chickens are there?
- 2) Person A can finish a job in 7 hours while person B can finish the same job in 8 hours. How long can they finish the job if they work together?
- 3) A car left a gas station traveling at a rate of 62.5 kph. Two hours later, a second car left the same gas station heading the same direction as the first car with a rate of 87.5 kph. After how many hours can the second car overtake the first car?

A student of MSA Mental Math Program can answer these three questions correctly in 30 SECONDS!

be a Math whiz!
